

Stormwater

Stormwater reflects rainwater or melted snow that runs off streets, lawns, and other sites that can be a source for contamination.

[Stormwater Management \(Stormwater-1\)](#)

Entire Document / Section 1 (Introduction)

Provides a centralized resource for information on stormwater BMP effectiveness (water quality treatment improvement) and provide the reader with guidance on how to use and implement that information.

[Phytotechnologies \(PHYT0-3\)](#)

Section 1.3.6 (Riparian Buffers)

Describes how as agriculture and urbanization encroach upon downgradient surface water bodies, NPS pollution is often generated in the runoff.

[Phytotechnologies \(PHYT0-3\)](#)

Section 2.4.2.1 (Irrigation Systems, Infiltration Control, and Storm Water Management)

Describes how stormwater (and irrigation) management control features may be designed into the site.
