

Ecological Land Reuse

Ecological land reuse is an alternative to land development following remediation of contaminated sites. An example of ecological land reuse is converting a previously contaminated site into a wildlife habitat.

[Making the Case for Ecological Enhancements \(EC0-1\)](#)

Section 1 (Introduction)

Ecological enhancements considered at the inception of planning for environmental remediation at Superfund, RCRA, and brownfield sites can be a cost effective and efficient way to increase, create, and/or improve wildlife habitat.
