

In Situ Bioremediation

The use of microorganisms for the degradation of contaminants.

[In Situ Bioremediation Page](#)

Information about the biological treatment of contaminants in the subsurface, typically in groundwater.

[A Systematic Approach to In Situ Bioremediation in Groundwater \(ISB-8\)](#)

[Section 1.3](#) (What is In Situ Bioremediation?) and [Figure 1-1](#)

Describes the application of biological treatment to the cleanup of contaminants of concern.
